## **DETAILED ACTION**

### ***Terminal Disclaimer***

The terminal disclaimer filed on 7/15/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,777,700 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

Claims 25-33 are allowed.

The following is an examiner's statement of reasons for allowance: As the claimed invention was read in light of the specification, the prior art of record fails to disclose or render obvious a method of adjusting an irradiation apparatus including a scattering device for increasing the size of said charged particle beam and a Bragg peak spreading device through which said charged particle beam passes, and moving at least one of said scattering device and said Bragg peak spreading device in a propagation direction of said charged particle beam.

The closest prior art, Hiramoto et al. (5,969,367), teach a particle beam irradiation apparatus including a scattering device for increasing the size of said charged particle beam and a Bragg peak spreading device through which said charged particle beam passes, and wherein at least one of said scattering device and said Bragg peak spreading device is installed in said irradiation apparatus. However, there is no teaching in the prior art about the ability to move at least one of these devices in a propagation direction of said charged particle beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
